- ...

***" tóng zhōu gòng jì " is a chinese idiom, which means we are in the same boat and cross the river together, in another word, we unite and help each other, work together to overcome difficulties.***

### CAMPUS LIFE

## ABOUT TONGJI UNIVERSITY

Tongji University is one of the leading universities in China under direct administration of Ministry of Education, listed on "Project 985" and "Project 211". With a history of over a century, Tongji has valued the balanced development of four functions, i.e. education, research, outreach, and culture inheritance and innovation.

The history of Tongji can be traced back to 1907 when German Medical School was founded by Erich Paulun, a German doctor in Shanghai. After being renamed Tongji German Medical School in the following year, it was formally established as a university in 1923. It became National Tongji University in 1927, one of the seven earliest national universities of China. Around 1949, Tongji already boasted five colleges of natural sciences, engineering, medical science, liberal arts and law, and enjoyed a fine reputation as a comprehensive university both home and abroad. Following a nationwide campaign of restructuring universities in 1952, Tongji became an engineering-intensive university with top-notch strength in civil engineering and architecture, which is second to none in terms of scale and number of disciplines. Since 1978, "two transforms" were launched, namely, the transforming to an international university by restoring links to Germany, and the transforming from a university focusing mainly on civil engineering to multi-disciplinary engineering university. In 1995, Tongji declared to be jointly built by the Ministry of Education and the Shanghai Municipal Government. By 2007 when it was celebrating its centennial, Tongji had become a comprehensive, international, research-oriented university with distinct features and global influence. In 2013, the university proposed its vision of "a sustainability-oriented, world-class university".

*2019 Opening Ceremony of International Degree Program, 61 students from 33 countries.*

## MY PERCEPTION ABOUT CHINA

“China is very large, but the recent achievements in field of Chinese transportation sector, like opening up highways and longest bridges, modernisation of transportation means, fast trains between distant cities, subways insides cities, electrical buses, using bikes...etc., all made moving from one place to another more easy and enjoyable.

They think big « self-reliance», I mean reliance on their own powers and resources rather than those of others, If they want to build a new airport, to manufacture their own planes, maglevs, rockets, aircraft carriers, super computers, nuclear plants, they just do it. No matter how much they're rudimentary at the beginning, because they will finish by getting very modernized and advanced at the end, the Chinese are taught in this way, i believe it is one of the secret principles inherited since the liberation revolution that helped to ensure the independence of China and its development.”

—Chenni Hadj from Alegria

“After living in China for almost a year, there are aspects of the culture that never ceases to surprise me. I believe that China has grown at an incredible rate and today is a land of many opportunities. I experience what it feels to live in a world leading economy, where everything can be done online using only your mobile phone. I was always curious about the “secrets” of Chinese medicine, but what surprised me was how much people here are physically active. For example, it is very common to see Chinese elderly going to the streets and doing all kinds of exercise! It is also beautiful how Chinese have a strong sense of family, the grandparents always helping to take care of their grandchildren and the parents investing in their child’s education.”

—Bianca Fernandes Novo from Brazil

“One thing that is common in the cities is patriotism and willing to help the country through any measure they can. All Chinese are proud of the long living history, culture, and ancestors value and have tried best to preserve them. I am amazed to see the way China has maintained its monuments. Shanghai, the place I live in is a city that never sits, and is giving everyone an experience of past, present and future. The well-preserved nature and cultures are easily bending with this rocketing world. Bund lights to Yuyuan walk, dancing grannies to techno clubs, traditional cuisines to the variety available, starry ground from Shanghai tower not only mesmerizes me but everyone who visits here.”

—Srijan Shrestha from Nepal

## ABOUT SHANGHAI

Life in Shanghai is rich, safe and convenient. Shanghai is a metropolitan - a melting pot of eastern and western culture, traditional and modern China. You have a variety of options when it comes to exhibitions, concerts, shows and entertainments. Shanghai is one of the safest and convenient city in China. Public resources and facilities. are readily available and accessible.

Living in Shanghai can be either relatively cheap or very expensive. It all depends on how you arrange your finance.

You can use your passport to set up a bank account at a bank near campus. These accounts can receive wire transfers in US dollars and Chinese Yuan from both international and domestic sources. You should check with your current bank to see if they have any reciprocity arrangements with banks in China. Remember to register a local mobile phone number before you open a local bank account.

Shanghai is one of the most international cities in China. Most young people understand and speak a limited English. However, you may find it difficult to communicate with local taxi drivers, cashiers in stores, or middle-aged and senior people. Therefore, it is helpful if you can learn how to say the address for the residence hall and campus in Chinese, or other basic Mandarin before you come, such as asking for road, asking for help, etc. Keep a copy of the address card we prepared for you in your purse or wallet in case the driver cannot understand you.

While you study in Shanghai, take the advantage to speak as much Chinese as you can at all times and do not be afraid to speak because you think your accent is horrible. You will find that locals are very encouraging to new speakers and will always compliment you on your speaking.

## UNEP-TONGJI IESD

### UNEP-Tongji Institute of Environment for Sustainable Development (IESD)

was joint established by Tongji and UNEP since 2002.

The institute has enrolled 525 students from 89 countries into the degree program. The Environment discipline of Tongji University **ranks A+** among the 155 universities in China according to the recent evaluation by the Chinese Ministry of Education.
