

Sonny Astani

Department of Civil and
Environmental Engineering

The Sonny Astani Department of Civil and Environmental Engineering at the University of Southern California is pleased to announce a new additional emphasis of our Civil Engineering PhD program: *Construction Engineering and Management*.

This new emphasis focuses on uses of information technology applied to integrated engineering, architecture and construction practice, and civil engineering project lifecycle management. These technologies enable more efficient, performance-driven and environmentally-sensitive projects that meet the challenges of the megacities of today and the future.

Please see usc.edu/cee/cem for more information.
